## **DETAILED ACTION**

1. The following is an examiner's statement of reasons for allowance: None of the prior art references teach (alone or in combination) all the limitations together. within the independent claims 1,21,41,46. For example, the independent claims contain limitations, selecting from the set of communication devices a first communication device with a highest probability of being presently accessible to the recipient at the time the request is received. Applicants' arguments [filed 03/23/07, pg. 15-25] are considered persuasive to the limitations of this claim over the prior art of record. Examiner agrees that the limitations of selecting from the set of communication devices a first communication device with a highest probability of being presently accessible to the recipient at the time the request is received [Specification, pages 23-30]. Most prior art teaches transmitting a request/message to a nearby wireless device of a user based on his/her device GPS location information, but not considering for selecting a device of the user with a highest probability of being presently accessible. Therefore, the combination of the limitations, within its environment, is allowable subject matter. in light of the specification and in view of the Applicants' persuasive arguments. The independent claims 1,21,41,46 (and their dependent claims) are allowable. since the claim language discloses this combination of limitations in accordance with the specification, over the prior art of record.
